Tanker Big Rig Truck Overturned into a Farming Canal, SPILL: 15-6725

- At 0318 hours a tanker big rig overturned into a farming canal causing the release of approximately 50 gallons of diesel from the cargo tank.
- California Highway Patrol (CHP) reported that the water in the canal is static, not moving.
- CHP personnel on scene advised that a towing company extracted the big rig from the canal and will be performing cleanup of the residual hazmat on 11/15/15.
- The CSWC made all notifications per SOP.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Rain will start late this evening through Northern California and spread southeast early Sunday, then taper off Sunday evening. Rain and snow will drop below pass levels. Low confidence for potential debris flows due to heavier embedded rainfall.
- Strong northwest to north winds will impact much of Southwest California in the wake of a passing cold front starting Sunday night and continuing into Monday, then shifting to the northeast late Monday night into Tuesday morning.
- High Wind Warning in effect until 0400 Sunday for areas in Siskiyou County
- High Wind Warning in effect from 1900 this evening through 1900 Sunday for areas in Modoc County
- High Wind Warnings in effect from 1300 Sunday to 1000 Monday for areas in San Bernardino, Riverside, San Diego Counties
- High Wind Watches in effect from Sunday evening through Monday morning for areas in Ventura and Santa Barbara Counties
- High Wind Watch in effect from Sunday evening through Tuesday morning for areas in Los Angeles County

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA

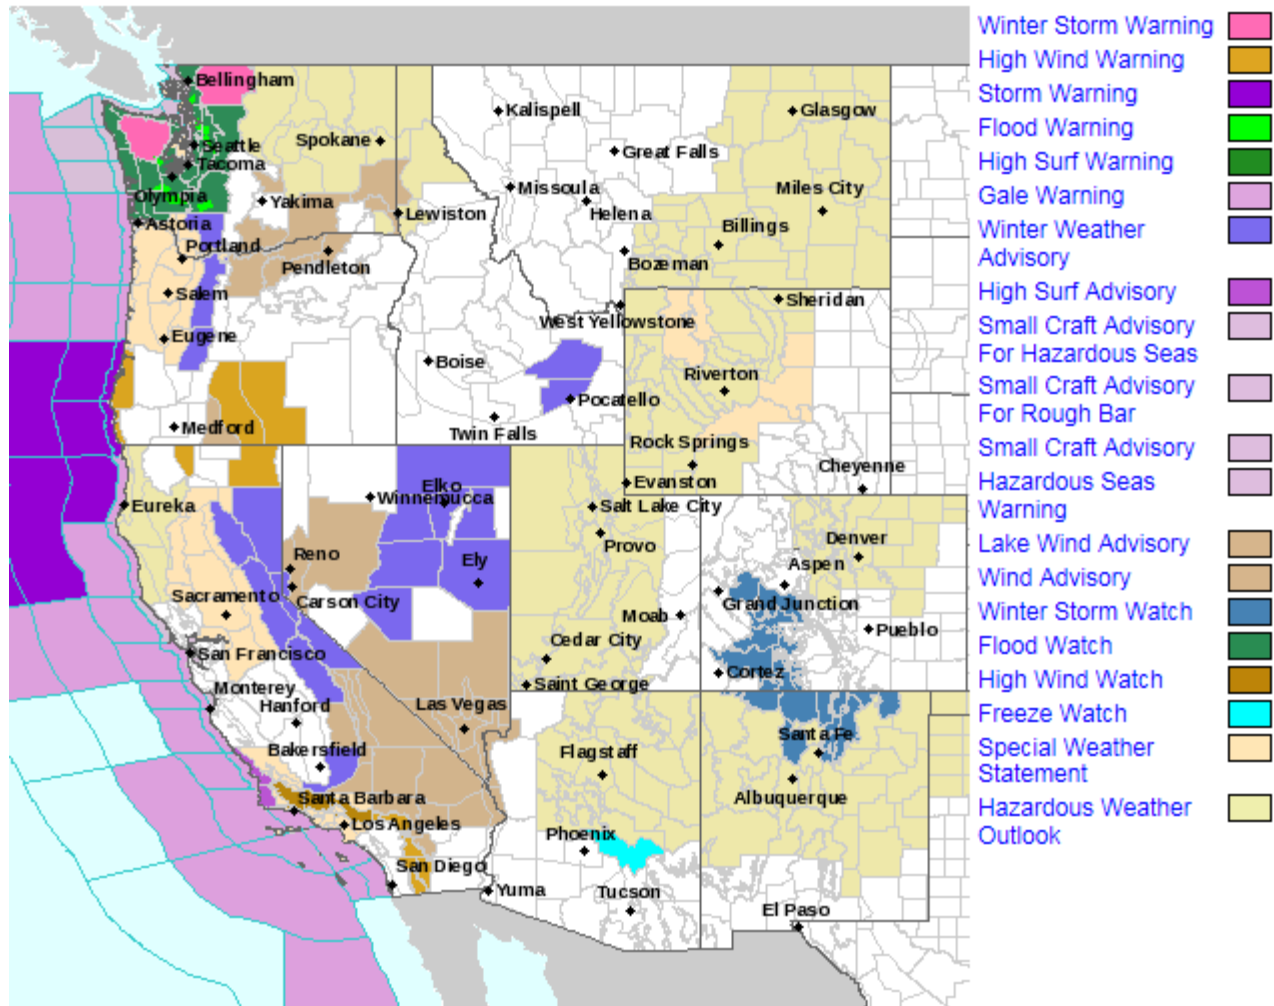

Sunny skies across interior Northern California today ahead of the approaching weather system over the eastern Pacific. Temperatures are similar to readings 24 hours ago and are mainly in the 50s and 60s. The atmospheric river will shift southward late tonight into Sunday morning as the upper trough approaches spreading precipitation inland across Northern California. Generally up to half an inch of rain is possible for the Valley, with 1-1.5 inches for the upslope areas of the Sierra. Much of this precipitation looks to fall in the cold sector of the system, meaning snow levels could be starting around 5000-6000', but quickly lowering from there on Sunday. 8-12 inches of snow accumulation are expected at the higher elevations with perhaps 2-4 inches down to around 5000'. Thunderstorms will also be possible Sunday, especially in the afternoon. Instability seems to favor the Sacramento Valley along with the adjacent Sierra foothills. Cold temperatures will again be likely behind the system, with frosty conditions perhaps possible in wind-sheltered portions of the Central Valley Sunday night. Most of the area will dry out on Monday as the system moves off to the east, however light overrunning precipitation will be possible across the far north through midweek. Temperatures should remain at or below normal through midweek.

SOUTHERN CALIFORNIA

A weak ridge of high pressure over California will maintain warm and very dry conditions over most of the region today. Maximum temperatures will be in the mid 50s to mid 60s across the mountains, with 70s to low 80s in the valleys. Minimum humidity will be mainly in the single digits and teens away from the Central Valley and its surrounding foothills as well as the immediate coast. Winds will be light today. Dramatic cooling will take place Sunday and Monday as a Pacific trough moves into the West Coast. Maximum temperatures over the warmer valley locations will only warm into the 60s. This trough will also bring scattered showers to Central California starting early Sunday morning and to Southern California starting Sunday afternoon. By early Monday morning when showers are expected to end, most of Central California will receive between a quarter inch and a half inch of rain and most of Southern California will receive less than a quarter inch of rain. However, most of the Sierra and its surrounding foothills will receive between a half inch and an inch of rainfall. The snow level will be between 4,000 and 5,000 feet, with up to a foot of new snow over the Sierra. Strong westerly winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes Sunday afternoon and evening and then strong northerly winds with the same speeds will occur over the south coast of Santa Barbara, Grapevine, and near the Colorado River Monday morning through Monday night. Northeast winds of 20 to 30 mph with gusts to 50 mph will surface across the mountains and below the canyons and passes of Southern California Monday night through Tuesday morning as high pressure builds into California from the Pacific. The ridge of high pressure will cause temperatures to warm Tuesday through the end of next week. Minimum afternoon humidity will drop into the teens Monday through the end of next week.

CAL OES Recovery

Inyo County Flooding

- Inyo County experienced flooding October 15 through October 18, 2105, in Death Valley and requested assistance from the U.S. Small Business Administration (SBA). Although the county did not report physical losses to homes and businesses, information indicated there may be economic losses to businesses. Cal OES IA is currently working with Inyo County on capturing economic loss information for businesses. If the County is able to provide information to the State that reveals at least five businesses have suffered substantial economic injury within 120 days from the incident period of the disaster, a formal request may be sent from Cal OES requesting SBA implement its Economic Injury Disaster Loans (EIDL).

Los Angeles County Flooding

- On October 15, 2015, heavy rain and hail occurred in the Palmdale-Lancaster area at approximately 3:00 pm, which caused mudslides and flash floods, and resulted in road closures, stranded vehicles, power outages and other damages. Portions of Interstate 5 and other roads in the area were closed. Evacuation centers were opened for those not sheltering in place as necessary. Areas most impacted by the incident include the unincorporated areas of Lake Elizabeth, Hughes Lake, Leona Valley, Green Valley and the cities of Lancaster and Palmdale. Currently, a gubernatorial State of Emergency has not been proclaimed. Los Angeles County opened a Local Assistance Center (LAC) October 30-31, 2015, and November 7, 2015. State participation included representatives from the Department of Motor Vehicles, Contractors State License Board, and Department of Insurance. On November 4-5, 2015, representatives from Los Angeles County, Cal OES IA, and the U.S. Small Business Administration (SBA) conducted a joint preliminary damage assessment (PDA). Based on the findings, Cal OES submitted a request for a physical loss disaster declaration to SBA on November 12, 2015. If a declaration is approved, SBA will make low-interest loans available to homeowners, renters, businesses, and private non-profit organizations to apply.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

Local Emergency Proclamations:

A total of 62 local Emergency Proclamations have been received to date from city, county, and tribal governments, as well as special districts:

- 28 Counties: Butte, Colusa, El Dorado, Fresno, Glenn, Inyo, Humboldt, Kern, Kings, Lake, Madera, Mariposa, Merced, Modoc, Plumas, San Bernardino, San Joaquin, San Luis Obispo, Santa Barbara, Shasta, Siskiyou, Sonoma, Stanislaus, Sutter, Trinity, Tulare, Tuolumne, and Yuba.
